Dynamic and detail-oriented Full Stack Developer with over 1 years of experience specialising in Angular, ASP.NET, and SQL. Proven ability to design, develop, and implement web applications that meet the highest standards for performance, scalability, and user experience. Adept at collaborating with cross-functional teams to deliver robust and innovative solutions on time. Strong problem-solving skills, a passion for continuous learning, and a commitment to staying current with the latest industry trends and best practices.

Experience

feb 2024 – PRESENT

Junior Web Developer | Atappisoft| Ajitgarh, Punjab

As a key contributor to the development of a comprehensive web application, I played a crucial role in implementing essential features on both the frontend and backend. My responsibilities spanned a wide range of tasks, from integrating sophisticated APIs to ensuring robust authentication mechanisms, all aimed at delivering a seamless, user-friendly, and secure experience for all users. I collaborated closely with cross-functional teams to understand requirements, design solutions, and implement features that enhanced the application's overall functionality and performance.

Sept 2023 – jan 2024

Full Stack Developer (trainee) | CS Infotech| Chandigarh

I received comprehensive training in Full Stack Development. This training provided invaluable insights into industry standards, best practices, and the software development lifecycle. I honed my skills in ASP.NET Core, Angular, SQL, React, Node.js, and MongoDB through a curriculum that covered most practical applications. By working on real-world projects and scenarios, I enhanced my technical proficiency and improved my ability to collaborate with team members, manage project timelines, and deliver high-quality software solutions. This experience equipped me with a solid foundation in both frontend and backend development, preparing me to tackle complex development challenges and contribute meaningfully to any software development team.

Skills

Frontend Development: Angular, HTML5, CSS3, JavaScript, TypeScript
Backend Development: ASP.NET, C#, RESTful APIs
Database Management: SQL Server,
Version Control: Git, GitHub
